

SAUGAT ADHIKARI

asaugat04@gmail.com | [9814057843](https://www.linkedin.com/in/asaugat04) | Kathmandu | [LinkedIn](#) | [Portfolio](#)

Professional Summary

Software Engineer with 3+ years of experience building scalable web applications using React, Next.js, and TypeScript. Experienced in designing responsive user interfaces, optimizing application performance, and developing maintainable software for production environments. Comfortable working across the full stack with NestJS, PostgreSQL, and TypeORM, contributing to API development and end-to-end feature delivery. Passionate about writing clean, scalable code and collaborating across product, design, and engineering teams.

Work Experience

Software Engineer – Online Notes Nepal

June 2025 to Present | Baneshwor, Kathmandu

- Led development of the web platform, delivering production-ready features across the public website, student dashboard, and administrative CMS using Next.js, React, and TypeScript.
- Architected and maintained a scalable frontend with reusable components, shared utilities, and a Turborepo-based monorepo, improving code consistency and development efficiency.
- Built a customizable CMS with dynamic page composition, reusable content blocks, and drag-and-drop page management, while contributing to backend development using NestJS, PostgreSQL/MySQL, and TypeORM.
- Designed and implemented core learning features including study materials, mock tests, rich content editing, and administrative workflows to support content management at scale.
- Improved SEO and Core Web Vitals through dynamic metadata generation, XML sitemap automation, server-side rendering, Suspense, lazy loading, and image optimization.
- Collaborated closely with product managers, designers, and backend engineers to deliver high-quality features while maintaining performance, accessibility, and responsive user experience.
- Mentored frontend developers through code reviews, technical discussions, and engineering best practices, helping improve code quality and maintainability across the codebase.

Technologies: Next.js, React, TypeScript, Tailwind CSS, Turborepo, TanStack Query, Redux Toolkit, NestJS, PostgreSQL, Docker

Frontend Engineer – Dome Infosys

Feb 2024 to May 2025 | Gaushala, Kathmandu

- Delivered production-ready web applications across recruitment, healthcare, CMS, and SaaS platforms using React, Next.js, and TypeScript.
- Built responsive, reusable user interfaces, administrative dashboards, authentication flows, and CMS modules for multiple client projects.
- Integrated REST APIs and implemented scalable client-side state management to support complex business workflows and improve application maintainability.
- Optimized application performance through component refactoring, code splitting, lazy loading, and modern rendering strategies while ensuring responsive and accessible user experiences.
- Collaborated with cross-functional teams throughout the software development lifecycle, participating in feature planning, code reviews, and technical discussions to deliver high-quality software.

Technologies: React, Next.js, TypeScript, JavaScript, Redux Toolkit (RTK), Formik, Yup, Tailwind CSS, Framer Motion, REST APIs, Git

Frontend Developer and Instructor – Smart Computer

Dec 2022 to May 2023 | Birtamode

- Modernized the organization's website using React and Tailwind CSS, improving responsiveness and maintainability.
- Prepared lesson plans and delivered interactive coding classes focused on C, C++, and JavaScript fundamentals, emphasizing problem-solving and object-oriented programming.
- Provided coding exercises and one-on-one support to students, enhancing their practical skills and engagement.
- Taught batches of 10–20 students in group classes with hands-on sessions, resulting in improved student coding fundamentals and higher project completion rates.

Programming Instructor – Center for Information Technology (CIT)

Jan 2022 to Aug 2022 | Bhadrapur

- Taught C, C++, and JavaScript with emphasis on problem-solving and object-oriented programming.
- Designed coding exercises, assignments, and projects while evaluating student progress through practical assessments.

Skills

Languages: TypeScript, JavaScript (ES6+), Python, C, C++

Frontend: React, Next.js, React Native, Redux (RTK Query), Tanstack Query, Tailwind CSS, HTML5, CSS3, React hook form, zod

Backend: Nest.js, Express.js, Node.js, TypeORM

Database: PostgreSQL

DevOps / Tools: Docker, Git, Turborepo, Figma

Methodologies: Agile, Scrum, Kanban

Soft Skills: Time management, Communication

Projects

Jobscater (Leelak HR Services)

Recruitment Platform

- Developed the frontend for a recruitment platform connecting employers and job seekers through modern hiring workflows.
- Built responsive dashboards, authentication flows, job listings, CV generation interfaces, and AI-assisted recruitment features.
- Integrated REST APIs with reusable state management patterns to deliver scalable and maintainable user experiences.
- Worked closely with backend engineers to implement production-ready recruitment workflows across multiple user roles.

HamroRestro

Multi-Tenant Restaurant Management System

- Developed key frontend modules for a multi-tenant restaurant management platform supporting multiple restaurants through isolated subdomains.
- Built Order Management, Accounts, and Supplier Management modules with responsive and intuitive user interfaces.
- Collaborated with backend developers to integrate business workflows including orders, accounting, inventory, and restaurant operations.
- Contributed to a scalable SaaS architecture supporting tenant-based management.

Online Notes Nepal

Digital learning platform

- Led frontend development for a digital learning platform providing study notes, mock tests, and exam preparation resources for students.
- Built the complete frontend for both the public website and the administrative CMS, implementing responsive, reusable, and accessible interfaces.
- Collaborated on backend development using NestJS and MySQL to deliver CMS functionality and content management features.
- Improved SEO and Core Web Vitals through server-side rendering, metadata automation, scalable XML sitemap generation, and modern rendering strategies.
- Solved complex rendering challenges including large-scale dynamic sitemap generation and mathematical content rendering.

Vatsalya

Healthcare Platform

- Led frontend development for a healthcare platform specializing in IVF, IUI, and fertility treatments.
- Built responsive service pages, doctor profiles, inquiry forms, and CMS-driven content management features.
- Improved SEO, accessibility, and page performance while maintaining a consistent design system.
- Collaborated with designers and backend engineers to deliver a scalable and user-friendly healthcare experience.

Kheldrishya CMS

Sports News CMS

- Built a fully customizable CMS enabling administrators to create and manage dynamic website pages through drag-and-drop page sections.
- Developed the complete frontend while contributing to backend development using NestJS, PostgreSQL, and TypeORM.
- Implemented reusable content components and flexible page-building capabilities for non-technical content editors.
- Collaborated on API design and CMS architecture to support scalable content management.

Education

Bachelor's of Science Computer Science and Information Technology (Bsc. CSIT)

Mechi Multiple Campus | Bhadrapur, Jhapa | July 2024

Higher Secondary Education (+2 Science)

Laxmi secondary schook | Birtamode, Jhapa | November 2019
